Re: Anemoment TriSonica Sensors – TSCA (Toxic Substances Control Act) –
Certificate of Conformance

To parties inquiring on the compliance status of the Anemoment TriSonica sensors to the TSCA (Toxic Substances Control Act) Section 6 (h) as issued by the United States Environmental Protection Agency (EPA), Anemoment provides the following information:

Anemoment TriSonica products are, to the best of our research and knowledge, compliant with the Toxic Substances Control Act, Section 6 (h) of 6 January 2021 regarding the restriction of the five persistent, bioaccumulative, and toxic (PBT) substances listed below.

- Decabromodiphenyl ether (DecaBDE) (CAS No. 1163-19-5)
- Phenol, isopropylated phosphate (3:1) (PIP (3:1)) (CAS No. 68937-41-7)
- 2,4,6-Tris(tert-butyl)phenol (2,4,6-TTBP) (CAS No. 732-26-3)
- Hexachlorobutadiene (HCBd) (CAS No. 87-68-3)
- Pentachlorothiophenol (PCTP) (CAS No. 133-49-3)

We recognize that the semiconductor industry is at present assessing the hypothetical presence of PIP (3:1) in integrated circuits. Anemoment will continue to monitor for relevant supplier updates on semiconductor components. In the unlikely event that a semi-conductor component of the Anemoment sensors is found to contain PIP (3:1), Anemoment asserts that TriSonica sensors come within the Aerospace Industry exemption outlined in the EPA Rule, which allows for the “Processing and distribution in commerce for use in new and replacement parts for the automotive and aerospace industry. . . .”

Thank you for your query and continued interest in Anemoment products.

Respectfully,

3 September 2021

Elizabeth Hervey Osborn, Manager/CEO Anemoment LLC

The information provided in this document is based upon technical data believed to be reliable and is accurate to the best of our knowledge.
